MALACHI ALUSA

WEB DEVELOPER

PROFILE

Passionate Full Stack Developer with expertise in React, Next.js, and automation testing. Currently a Jr. Developer at Nature's Sunshine, I specialize in building scalable web applications using JavaScript, TypeScript, Node.js, and C#. My experience spans both software development and automation, including streamlining workflows in Excel/Google Sheets and testing government websites. Adept at solving complex problems and collaborating with teams, I thrive in fast-paced environments that value innovation, efficiency, and high-quality solutions.

Nature's Sunshine Products

Ecommerce Website

This is website of the company I currently worked for. It utilizes Next.js, and Optimizely for a content management system. I primarily worked on the front end of the project. I contributed: integrating checkout systems, custom sign-up modules, multiple customization options for content management, bug fixes, and many more features Check it out here **https://www.naturessunshine.com/**

Peas and Thank You

Smart Food Application

I built this application to help users see required ingredients for recipes before going to a recipe site. This app executes API calls from a user search and returns meal options. It contains ingredient lists, details nutritional info, and health filtering system. This project is meant to showcase my understanding of APIs

QA Associate

Tecuity | 40 3800 N, Hyde Park, UT 84318

As a QA associate, I worked with a team of developers and testers to provide testing for software use by Secretaries of State. Some of my contributions include:

- Run tests for user driven stories about bugs, desired features, and updates for websites and software.
- Create automated regression tests using playwright.
  - Aid in manual regression tests in multiple environments for Secretary of State websites
- Systematically break down and recreate software issues for testability.
- Organize and maintain schedule in Azure environment.
